jct JOURNAL OF COATINGS TECHNOLOGY

Annual Index

1981

Volume 53
Numbers 672–683
January thru December, 1981

Journal of Coatings Technology
1981 Annual Index

Keyword Subject Index

Prepared by Technical Information
Systems Committee

Adhesion

Wet adhesion, effect of polymer and paint properties Nov., 57

Analysis

Liquid coatings, binder, pigment and solvent .... Mar., 51

Application and Finishing

Airco solvent recovery system (Nitrogen cure oven) Apr., 53
Electrodeposition, cathodic ..... Jan., 52

Biological Materials and Processes

Aerobasidium pullulans (mildew), lab growth, melanin synthesis ..... Oct., 23
Aerobasidium pullulans (mildew), lab growth, paint defacement ..... Apr., 32
Marine fouling ..... July, 46
Mildew ..... Sept., 47

Chemical Materials and Processes

Agricultural and inorganic materials as paint raw materials ..... Nov., 45
Aluminum organic compounds as alkyd modifiers Sept., 55
Cathodic delamination as test of corrosion resistance ..... Jan., 77
Cathodic electrodeposition ..... Jan., 52
Corrosion inhibitors ..... July, 29
Emulsifiers for methyl methacrylate polymerization June, 45
2,3-Epithiopropyl methacrylate (ETPM) in crosslinkable emulsions ..... Feb., 49
Fluorochemical (Fluorad) surfactants for epoxy coatings, ... Dec., 45
Glasses for ceramic coatings ..... Aug., 65
Glycol ethers and alcohols, water-based coating cosolvents ..... June, 33
Maleimide compounds in crosslinkable emulsions May, 45
Melanin biosynthesis by mildew ..... Oct., 23
Methane diisocyanate (MDI) adducts (blocked), reactivation study ..... Feb., 35
Sulfonium salts (alkyl substituted) as cationic polymerization initiators ..... Apr., 43
Trifluoromethanesulfonate (amine triflate) catalyst for epoxies, ... Dec., 45

Coatings

Antifouling ..... Apr., 57
Corrosion-resistant ... Jan., 52; July, 29; Oct., 81; Dec., 27
Electrodeposited ..... Jan., 52
Exterior, for plywood ..... Feb., 61
Formulation, simplex lattice design (4 components) Mar., 33
Fungicigal ..... Sept., 47
Marine, antifouling ..... July, 46
Subjective comparison, statistical methods ..... Aug., 55

Acrylic, amine-neutralized, drying ..... May, 31
Alkyd, aluminum complex modified ..... Sept., 55
Alkyl silicate, zinc-rich, film formation ..... June, 23
Epoxy, cast, residual strain ..... Jan., 85
Epoxy, high solids, fluorochemical catalyst and surfactant ..... Dec., 45
Glass enamels ..... Aug., 65
Glazes ..... Aug., 65
High solids ..... Dec., 35
High solids, solvent selection ..... Sept., 67
Latex, flat, extender dilution efficiency ..... Sept., 75
Latex, wall, extender evaluation ..... Oct., 27
Latex, wood, mildew growth and defacement .... Apr., 32
Maleimide-type emulsion, crosslinking ..... May, 45
Methacrylate-organotin, antifouling ..... Apr., 57
Methacrylic-thiirane emulsion, crosslinking ..... Feb., 49
Polybutadiene, cathodic delamination ..... Jan., 77
Polyester, high solids ..... Oct., 33
Polyurethane, blocked MDI adduct reactivation . Feb., 35
Poly (vinyl alcohol), cast, solvent diffusion ..... Mar., 41
Porcelain enamels ..... Aug., 65
Silicone release paper coatings ..... Aug., 49
Solvent-based millbase, high speed TiO_2 dispersion Oct., 57
Thermoplastic, internal stress ..... June, 39
Thermoplastic, internal stress, effect of pigments . July, 40
Thermosetting, internal stress ..... June, 39
Thermosetting, low temperature cure ..... Apr., 43
Vinyl - acrylic emulsion, wet adhesion ..... Nov., 57
Water-based, corrosion-resistant ..... Dec., 27
Water-based, non-toxic primers ..... Nov., 27
Water-based, organic cosolvent selection ..... June, 33
Water-reducible, food container ..... Mar., 23

Coatings—Liquid Properties and Tests

Drying, amine-neutralized poly (acrylic acid) and copolymers, effect of water ..... May, 31
Drying time (circular dry time recorder), alkyl silicate zinc-rich coatings ..... June, 23
Drying time, high solids alkyds, effect of aluminum complex modifiers ..... Sept., 55
Surface tension and viscosity of high solids coatings, effect of solvents ..... Sept., 67

Coatings Industry

Agricultural and inorganic materials as paint raw materials ..... Nov., 45
Materials and government regulations ..... Mar., 58

Color and Appearance

Densitometry, alkyl silicate zinc-rich coatings .... June, 23
Extender dilution efficiency ..... Sept., 75
Reflectance as measurement of mildew defacement Apr., 32
White hiding power, TiO_2 and spacing extenders . Nov., 65

Computer Applications

Coating corrosion evaluation system, Princeton Applied Research ..... Oct., 41
Polymer analysis, gel permeation chromatography HPGPC ..... Jan., 69
Solvent diffusion constants, poly (vinyl alcohol) cast films ..... Mar., 41

Cure and Curing

Airco solvent recovery system (nitrogen cure oven) Apr., 53
Crosslinking and solvent loss in cast epoxy, effect on residual strain ..... Jan., 85
Crosslinking, maleimide-type emulsion polymers . May, 45
Crosslinking, methacrylic - thiirane emulsion polymers ..... Feb., 49
Curing epoxy high solids coating, amine triflate catalyst ..... Dec., 45
Curing reaction parameters, thermosetting coatings Apr., 43

Environment

Airco solvent recovery system (nitrogen cure oven) Apr., 53

Exposures and Weathering

Accelerated, water-reducible non-toxic metal primers ..... Nov., 27
Accelerated, Weatherometer, coated plywood .... Feb., 61
Outdoor, coated plywood ..... Feb., 61
Sea water raft tests, methacrylate - organotin antifouling coating ..... Apr., 57
Weathered coated panels, examination by ESCA and FTIR ..... Nov., 39

Film Degradation/Deterioration and Tests

Coated metal corrosion and coating deterioration, water-based non-toxic metal primers ..... Nov., 27
Coated metal corrosion and delamination, electrochemical evaluation, computerized ..... Oct., 41
Coating cathodic delamination, as corrosion resistance test ..... Jan., 77
Face checking, coated plywood ..... Feb., 61

Film Formation

Amine-neutralized acrylic film drying, effect of amine branching and hydrophilicity ..... May, 31
Cross linking and solvent loss, effect on cast epoxy film residual strain ..... Jan., 85
Effect of cosolvent miscibility and viscosity, water-based coatings ..... June, 33
Mechanism, alkyl silicate zinc-rich coatings ..... June, 23
Solvent diffusion, cast poly (vinyl alcohol) films . Mar., 41

Film Properties (Dry Film) and Tests

Corrosion resistance, water-oased non-toxic metal primers ..... Nov., 27
Dynamic mechanical testing (Rheovibron), alkyl silicate zinc-rich coatings ..... June, 23
Electrical properties, dielectric spectroscopy ..... July, 53
Film permeability and corrosion resistance, water-based coatings ..... Dec., 27
Film permeability coefficients, determination .... Sept., 61
Internal stress, cantilever beam method ..... June, 39
Internal stress, cantilever beam method, pigmented thermoplastics ..... July, 40
Mechanical properties (stress-strain), Instron, pigmented thermoplastics ..... July, 40
Mildew defacement, latex coatings ..... Apr., 32; Oct., 23
Physical properties, maleimide-type crosslinkable emulsion polymers ..... May, 45
Residual strain, cast epoxy films, effect of crosslinking and solvent loss ..... Jan., 85
Surface tension (contact angle data), silicone release paper coatings ..... Aug., 49
Water retention, amine-neutralized acrylic coatings May, 31
Water vapor transmission, permeation cup method Sept., 61
Wet adhesion, effect of polymer and paint properties ..... Nov., 57

Government Regulations

Coating and graphic arts/printing industries ..... Mar., 58
Paint effluent waste treatment ..... Aug., 71

Graphic Arts/Printing Industry

Materials and government regulations ..... Mar., 58

Instrumental Analysis and Methods

Binder and pigment in coating film ..... Apr . 63
Binder, pigment and solvent in liquid coating .... Mar., 51
Dielectric spectroscopy, coating and polymer electrical properties ..... July, 53
Differential scanning calorimetry, blocked MDI adduct reactivation ..... Feb., 35
Differential scanning calorimetry, water reducible acrylics and epoxies ..... Mar., 23
Electron microscopy (ESCA), chrome yellow pigments, stabilized ..... Dec., 51
Fourier transform infrared spectroscopy (FTIR), weathered coatings ..... Nov., 39
Gel permeation chromatography, high performance (HPGPC), polymer analysis, computerized .... Jan., 69
Gel permeation chromatography, water reducible acrylics and epoxies ..... Mar., 23
Infrared spectroscopy, blocked MDI adduct reactivation ..... Feb., 35
Photoelectron spectroscopy for chemical analysis (ESCA), weathered coatings ..... Nov., 39
Scanning electron microscopy, alkyl silicate zinc-rich coatings ..... June, 23
Thermogravimetry, alkyl silicate zinc-rich coatings June, 23
X-ray diffraction, chrome yellow pigments, stabilized Dec., 51
X-ray photoelectron spectroscopy, chrome yellow pigments, stabilized ..... Dec., 51

Interfacial Phenomena

Cathodic delamination, coating-metal interface .. Jan., 77
Film permeability, permeation cup method ..... Sept., 61
Surface tension, silicone release paper coatings .. Aug., 49

Manufacturing

High speed dispersion of TiO_2, solvent-based mill base ..... Oct., 57
Paint effluent waste treatment ..... Aug., 71

Paint Additives

Biologically active agents, antifouling ..... July, 46
Fluorochemical surfactants and flow control, epoxy high solids coatings ..... Dec., 45

Pigments and Extenders

Chrome yellows, effect of stabilizing coatings .... Dec., 51
CPVC and PVC, effect on internal stress of thermoplastic coatings ..... July, 40
Effect of pigmentation on blocked MDI adduct reactivation ..... Feb., 35
Extenders for latex wall paints ..... Oct., 27
Extenders, dilution efficiency ..... Sept., 75
Titanium dioxide and spacing extenders ..... Nov., 65
Titanium dioxide, solvent-based mill base for high speed dispersion ..... Oct., 57

Pollution and Wastes Control

Paint effluent wastes treatment ..... Aug., 71

Polymers and Resins

Electrical properties, dielectric spectroscopy ..... July, 53
Polymerization, cationic, sulfonium salt latent thermal initiators ..... Apr., 43
Solution properties, low molecular weight polymers Dec., 35

Acrylic, water-reducible, food container ..... Mar., 23
Epoxy, water-reducible, food container ..... Mar., 23
Maleimide-type emulsion, crosslinking ..... Mar., 45
Methacrylate - organotin, antifouling ..... Apr., 57
Methacrylic - thiirane emulsion, crosslinking .... Feb., 49
Methyl methacrylate, emulsion, molecular weight June, 45
Organotin, marine antifouling coatings ..... July, 46
Polyester, high solids, low VOC ..... Oct., 33
Polyurethane, blocked MDI adduct reactivation . Feb., 35
Poly (vinyl alcohol), cast film, solvent diffusion .. Mar., 41
Silicone, release paper coatings ..... Aug., 49
Thermosetting, low temperature cure ..... Apr., 43
Vinyl - acrylic emulsion, wet adhesion ..... Nov., 57

Solvents and Plasticizers

Chlorinated and non-chlorinated solvent mixtures deceptive flash point ..... May, 40
Cosolvents for water-based coatings, miscibility and viscosity ..... June, 33
Diffusion in cast poly (vinyl alcohol) films, kinetics Mar., 41
Effect on polymer solution properties ..... Dec., 35
Solvent loss and crosslinking, epoxy coatings, effect on residual strain ..... Jan., 85
Solvent selection for high solids coatings ..... Sept., 67

Statistical Methods

Simplex lattice design experiment (4 components), formulation ..... Mar., 33
Subjective comparison of coatings ..... Aug., 55

Substrates or Surfaces to be Coated

Metal, coated, electrochemical study of corrosion Oct., 41
Metal, corrosion and corrosion inhibition ..... July, 29
Metal, polybutadiene coated, cathodic delamination Jan., 77
Painted plywood, face checking ..... Feb., 61
Steel, corrosion protection by water-based coatings Dec., 27

Surface Preparation and Pretreatment

Pretreatments, effect on metallic corrosion ..... July, 29

Alphabetical Listing of Papers

A

Aluminum Organic Compounds in High Solids Alkyd Coatings—D.J. Love, Sept., p. 55.
An Accelerated Laboratory Procedure for Growing *Aureobasidium Pullulans* on Fresh Latex Paint Films—R.A. Zabel and W.E. Horner, Apr., p. 33.
Analysis of Paint—J.B. Lear, Mar., p. 51.
Analysis of Paint Films—J.B. Lear, Apr., p. 63.
Application of Simplex Lattice Design Experimentation to Coatings Research—K.K. Hesler and J.R. Lofstrum, Mar., p. 33.
Application of Statistical Methods to the Subjective Comparison of Coatings—W.E. Cracker and G.M. Deighton, Aug., p. 55.
Avoiding Excessive Titanium Costs—F.B. Stieg, Nov., p. 65.

C

Ceramic Coatings—G.J. Roberts, Aug., p. 65.
The Challenges of the Eighties in Coatings and Graphics Arts—H.F. George, Mar., p. 58.
Characterization of Organic Coatings Using Dielectric Spectroscopy—J.V. Standish and H. Leidheiser, Jr.—July, p. 53.
Comparison of the Ability of Selected House Paints to Retard Face-Checking of Plywood—J.A. Emery, Feb., p. 61.
Considerations On a Cantilever (Beam) Method for Measuring the Internal Stress in Organic Coatings—D.Y. Perera and D. Vanden Eynde, June, p. 39.
Corrosion Inhibitive Performance of Some Commercial Water-Reducible, Non-Toxic Primers—Golden Gate Society for Coatings Technology, Nov., p. 27.
Curing Coatings with an Inert-Gas Solvent System—R.D. Rothchild, Apr., p. 53.

D

Deceptive Closed Cup Flash Points of Solvent Mixtures Containing Chlorinated Solvents—J. Rybicky and J.R. Stevens, May, p. 40.

Design of Waterborne Coatings for the Corrosion Protection of Steel. Part I: Introduction—A Survey of Various Factors That Affect the Corrosion Protection of Coatings on Steel—New England Society for Coatings Technology, Dec., p. 27.
Design of Water Reducible Polymers for Use In Food Contact Applications—P.V. Robinson, Mar., p. 23.
Dilution Efficiency of Extenders—F.B. Stieg, Sept., p. 75.
Drying of Amine-Neutralized Poly (Acrylic Acid) and Related Copolymers—K.S. Raju and R.R. Myers, May, p. 31.

E

Effective Treatment of Paint Waste—J.A. Feledy and E.M. Antonucci, Aug., p. 71.
Electrochemical Techniques to Evaluate Corrosion of Coated Metal—D.V.S. Gupta, Oct., p. 41.
Evaluation by Photoelectron Spectroscopy and Electron Microscopy of the Stabilization of Chrome-Yellow Pigments—M.L. Somme-Dubru, M. Genet, A. Mathieux, P.G. Rouxhet, and L. Rodrique, Dec., p. 51.
Evaporation and Vapor Diffusion Resistance in Permeation Measurements by the Cup Method—E. Nilsson and C.M. Hansen, Sept., p. 61.
Examination of Weathered Coatings by Photoelectron Spectroscopy and Fourier Transform Infrared Spectroscopy—G.P. Cunningham and C.M. Hansen, Nov., p. 39.
Extender Pigments in Latex Wall Paints—Louisville Society for Coatings Technology, Oct., p. 27.

F

Film Formation Mechanism of Alkyl Silicate Zinc-Rich Coatings—T. Ginsberg, June, p. 23.

H

High Performance Gel Permeation Chromatography Characterization of Oligomers Used in Coatings Systems—C. Kuo and T. Provder, Jan., p. 69.
High-Solids Oligomer Research. A Prospectus—R.R. Myers, Apr., p. 29.

I

Internal Stress in Pigmented Thermoplastic Coatings—D.Y. Perera and D. Vanden Eynde, July, p. 40.

K

Kinetic Parameter Considerations for Maximizing Stability and Minimizing Cure Temperature of Thermosetting Coatings. Sulfonium Salts as Latent Thermal Initiators for Cationic Polymerization—S.P. Pappas and L.W. Hill, Apr., p. 43.
Kinetics of the Solvent Desorption from Polyvinyl Alcohol (PVA) Films—M. Dodin, Mar., p. 41.

M

Mechanism of Corrosion Inhibition With Special Attention to Inhibitors in Organic Coatings—H. Leidheiser, Jr., July, p. 29.
Melanin Biosynthesis in *Aureobasidium Pullulans*—D.J. Siehr, Oct., p. 23.
Mildew Research by Consortium—C.C. Yeager, Sept., p. 47.
Miscibility and Viscosity Considerations in Organic Cosolvent Selection for Water-Borne Coatings—P.M. Grant, June, p. 33.
Molecular Weight and Molecular Distribution of Poly (Methyl Methacrylate) in Emulsion Polymerization—R. Mertens, June, p. 45.

N

New Directions—The Paint Research Institute Research Program for the 80's—P.V. Robinson, Jan., p. 47.
New Terpolymers with Pendent Organotin Moieties as Antifouling Coatings—N.A. Ghanem, N.N. Messiha, M.M. Abd El Malek, N.E. Ikladious and A.F. Shaaban, Apr., p. 57.

O

Optimizing Resins for Low VOC—S.N. Belote and W.W. Blount, Oct., p. 33.

P

The Physical Chemistry of the Cathodic Electrodeposition Process—P.E. Pierce, Jan., p. 52.
Polymer and Paint Properties Affecting Wet Adhesion—S.M. Kambanis and G. Chip, Nov., p. 57.
PRI's Ongoing Research to Overcome the Problem of Mildew Defacement of Painted Surfaces—R.A. Brown, Aug., p. 29.
Proceedings of the Paint Research Institute No. 1-139—1959 to 1980—May, p. 57.

R

Recent Developments in Marine Antifouling Coatings—M.H. Gitlitz, July, p. 46.
Renewable Resources for the Coatings Industry: Part I: What and Where—Chicago Society for Coatings Technology, Nov., p. 45.
Report of the Research Director—R.R. Myers, Feb., p. 21.
Residual Strain Due to Solvent Loss from a Crosslinked Coating—S.G. Croll, Jan., p. 85.

S

Selection of Solvents for High Solids Coatings Systems—G. Sprinkle, Sept., p. 67.
Solution Properties of High Solids Intermediates—M.A. Sherwin, J.V. Koleske, and R.A. Taller, Dec., p. 35.
Solvent-Borne Millbase Development for High Speed Dispersion of Titanium Dioxide—C.C. Tatman, Oct., p. 57.
Some Substrate and Environmental Influences of the Cathodic Delamination of Organic Coatings—H. Leidheiser and W. Wang, Jan., p. 77.
Surface Tension of Silicone Release Paper Coatings—M.J. Owen, Aug., p. 49.
Synthesis of Blocked MDI Adducts, Their DSC Evaluation and Effect of Pigmentation—T. Anagnostou and E. Jaul, Feb., p. 35.

U

Use of Amine Triflate Catalysts and Fluoro-chemical Surfactants in High Solids Epoxy Coatings—R.R. Alm, Dec., p. 45.
Use of Maleimide Acceptors as a Means of Developing Crosslinking Emulsions—J.R. Grawe and B.G. Bufkin, May, p. 45.
Use of Thiirane-Functional Monomers as a Means of Developing Crosslinkable Emulsions—R.M. O'Brien, S.A. Brown, B.G. Bufkin, and J.R. Grawe, Feb., p. 49.

W

We Need to Help Our Products Go First Class—C.W. Finegan, Apr., p. 39.
